"Wow 'em with Technology"

Most of us spend too much time in meetings and unfortunately, some of those meetings can lean toward the lame. But thanks to some fairly compelling tech tools, meetings these days can be pretty cool. Webcams, hi-def projectors, laser presenters, stereo speakers and digital recorders have upped the wow factor considerably. And we've got 'em—the gear and accessories to make your meetings engaging, productive and anything but lame.

"Built-in speakers just can't compete."

Lightweight, clip-on speaker delivers full stereo sound anywhere you use your laptop—ideal for meetings.

D. Z205 Laptop Speaker Music, movies, video calls and more—whatever sound you enjoy on your laptop, you'll no doubt enjoy more in stereo. Pure digital audio comes completely plug-and-play and powered via USB, so there's no need for software or an external power supply. Attaches securely to most laptops and netbooks, just clip it on and go. Carrying case keeps it safe and sound (no pun intended). Black. Manufacturer's limited two-year warranty.

Epson Powerlite® S9 Multimedia Projector

"A whole lotta bang for your projector buck."

EPSON EXCEED YOUR VISION

A

A. S9 Multimedia Projector A smart addition to any office or classroom, the S9 delivers features and performance you'd expect to find on projectors that cost a heck of a lot more. 1.35x digital zoom and vertical keystone correction make for great positioning flexibility. Quick, convenient control is yours thanks to Instant Off® (no cool-down time needed), Direct Power On/Off (powers the projector with the flip of a wall switch), Monitor Out and Sleep Mode functions. Includes remote and carrying case. 11⅗" × 9" × 3⅑". Manufacturer's limited two-year warranty on projector; 90-day on lamp.

No.	Resolution	Brightness	Weight	Unit	Price
EPS-V11H376020	800 × 600 Pixels	2500 lm	5.1 lbs.	EA	489.99

1 BRIGHT SVGA resolution and 2500 lumens color/white light output project incredible image quality and bright, balanced displays in virtually any setting.

2 BRILLIANT Epson's patented 3LCD technology delivers brilliant color and uses 25% less electricity per lumen when compared to 1-chip DLP projectors.

3 PLUG-AND-PLAY A standard USB cable provides quick, intuitive connection for both PC and Mac®. Just plug in and you're ready to project.

4 CLASSROOM FRIENDLY Built-in closed captioning meets ADA 508 requirements for students with hearing impairments. Audio Out connections for auxiliary speakers make it adaptable for auditoriums.

5 ENERGY-EFFICIENT Epson's exclusive E-TORL® lamp minimizes power consumption, maximizes light efficiency and lasts up to 5000 hours!

6 SO AFFORDABLE There's only one way to look at it: you get amazing features for an amazing price.

"Keep take-aways from taking over."

Logitech

KNOW A Little History

No wonder they're #1.

Epson is the leading projector manufacturer in the world today, with good reason. From the beginning, Epson has been committed to offering projectors that deliver innovation and quality. In fact, Epson doesn't just use innovative technologies, they create them. For instance, Epson pioneered the industry with the invention of the world's first optical projection engine, 3LCD technology, and for two decades it's been the market's recognized leader. Epson's exclusive E-TORL® lamps are designed for up to 50% more life. Plug-and-play setup allows instant projection from a PC via a simple USB connection. And while Epson sets the standards for quality and innovation, they also recognize that cost counts. That's why Epson continues to develop projectors that not only provide amazing results, they also promise a low total cost of ownership.

HELP Trends

Meetings.
They've come a long way, baby.

These days the well-equipped conference room comes complete with hi-def video and sound equipment, interactive whiteboards and video conferencing gear. Speaking of which, you may not even be in the same country as the event you're attending, let alone in the same room. Welcome to the new era of business meetings.

Webcams. When face-to-face isn't feasible, video conferencing really is the next best thing to being there. The latest technology delivers improved interfaces, smooth video streaming and crisp, clear audio.

Online Magic. A wireless receiver, a click of a mouse, plus the right connections and any presentation is as good as global. Shareware, voice and keyboard chat, online polls, demos and webinars can bring everyone together virtually, no matter where they happen to be.

Hybrid meetings. They're a combination of "live" and virtual components so participants get the best of both worlds. Either way we're talking increased productivity; reduced time and travel expenses. Clearly, the way we meet just gets better and better.

"Mighty mouse."

With nice and precise optical tracking, wireless freedom and built-in receiver storage, it's mighty handy for meetings.

D. 2.4GHz Wireless Optical Mouse Plug-and-play, four-button mouse automatically establishes a wireless link when the receiver's connected so it's good to go wherever you set up. Four-way scroll wheel makes for easy navigation and provides super control. USB connectivity. Energy saving perks and extra-long battery life come courtesy of preprogrammed sleep mode, low battery indicator and manual on-off switch. Requires 2 AAA batteries (included). Compatible with Mac® OSX 10.2.8 and later, Windows® 2000, XP, Vista™, 7. Manufacturer's limited one-year warranty.

No.	Color	Range	Hand Usage	Unit	Price
IVR-61020	Graphite	26ft.	Left/Right	EA	29.99

"An elegant tool for a more civilized meeting."

The laser pointer. What a modern-day Jedi would use to keep an audience focused.

Ultra Bright!

E. Class 3A Pen-Style Laser Pointer Perfectly designed for large venues. The high-impact plastic pointer shines an ultra-bright red laser dot onto any visual up to 500 yards away so you can engage the audience and still move around. Powerful beam is visible even in the brightest rooms. Lightweight design means less fatigue during long meetings. Requires 2 AAA batteries (included). Manufacturer's limited one-year warranty. See page 15 for note on Class 3 lasers.

No.	Color	Unit	Price
QRT-MP1200Q	Black	EA	19.99

"A lean, green, little printing machine."

DON'T FORGET THE TONER

The smallest color laser printer in the world also happens to be one of the most energy efficient.

A. LaserJet Pro CP1025NW Color Printer HP Auto-On/Auto-Off and Instant-On technologies turn your printer on when you need it, off when you don't—using up to 65% less energy than competing lasers. Plus, with the same cost per page to print in black as with a black-and-white HP LaserJet, you're saving more than energy. Create and print your own high-impact collateral in brilliant color; HP Creative Studio for Business software is included. Built-in Ethernet and wireless 802.11b/g/n networking make for easy printing from anywhere in the office. The low down: 17 ppm/black, 4 ppm/color; first page out in under 27.5 seconds. Up to 600 × 600 dpi. 150-sheet paper tray. 15,000 page monthly duty cycle. 64MB memory, non-expandable. USB connectivity. ENERGY STAR® Qualified. Manufacturer's limited one-year warranty.

HELP Smart Solutions for the SMB

I'm a fan of extended warranties. There, I said it.

I know what the other side says—extended warranties are a scam, a way for the manufacturer to capitalize on unfounded fear and make a bigger buck on the sale.

Seriously, people.

The reality is this. Printing and imaging devices are typically the biggest ticket gear you'll own. And like it or not, "stuff" happens. Repairs and replacements can cost a lot, so can lost productivity and business interruption.

Why risk it?

Extended warranties provide a hassle-free safety net that gives you options when you need them most.

Find the one that works for you:

Additions replace the original warranty with a higher level of service. Extensions begin when the original expires. Conversions convert one type of warranty into another. You'll also find service plans offering unlimited on-site support; return-to-depot plans that cover the cost of off-site repairs; and one-time exchange warranties—something breaks, you return it for a new one. Nothing like a little peace of mind, I always say.

11-SD-L1-MAY

"Speed. Easily one of its most attractive features."

At 25 ppm black AND color, there's no waiting for brilliant, high-impact output.

D. MFC-9460CDN Color Laser All-in-One with Networking Sure it's fast, but this AIO has more going for it than impressive speed. For one thing, flexible connectivity. Install it on a wired network via Ethernet or connect locally to a single computer via USB. Likewise print PDF and JPEG files directly from, or scan to a USB drive—no computer required. Use the 250-sheet paper tray for letter or legal size sheets and the 50-sheet multi-purpose tray for envelopes and thicker media. Multi-page copying, scanning and faxing come courtesy of the 35-page auto document feeder. The lowdown: print resolution up to 2400 × 600 dpi. Auto duplexing. 40,000 page monthly duty cycle. High-speed 33.6 kb/s fax modem. 128MB memory, non-expandable. 5-line/22-character display. ENERGY STAR® Qualified. Manufacturer's limited on-site one-year warranty.

HELP Simple Solutions for the Large Enterprise Business

Tape Ain't Dead.

According to the IDC Digital Universe Study, by 2020 the amount of digital data is set to reach 35 Zettabytes. That's one trillion gigabytes. No surprise then that in survey after survey, storage managers list data backup and recovery as a top priority.

The optimum storage scenario. The smart guys know it includes both disk and tape. That's right, disk AND tape. You might find yourself thinking, with all the "advanced" storage technologies out there, tape is still relevant? You bet and here's why:

LTO (Linear Tape-Open) revolutionized data storage. Right from the start LTO has had it all: low cost, huge capacity, exceptional speed, amazing reliability. No wonder it's become the tape technology of choice, selling to the tune of over 150 million cartridges in just over 10 years.

Beyond speed and capacity. LTO offers something more: off-line, portable storage—and that may be its biggest draw.

Face facts. If data's online or even replicated on disk, it's vulnerable. Viruses, hackers, operator error and Mother Nature are just a few of the potential threats. Tape can be removed from its drive and stored far away, essentially eliminating the risk.

LTO—Powerful. Reliable. Here to stay. Be on the lookout for Generations 6, 7 and 8 coming soon to a drive near you.

TDK

"When lesser data storage just won't do."

LTO's the way to go. Huge capacity. Optimized performance. Excellent reliability.

E. LTO Cartridges Single reel, open format tape cartridges are made for users with big storage needs. Perfect for high-capacity backup, restoration and archiving. Scalability to accommodate a wide range of system platforms.

Epson PowerLite® 1775W Multimedia Projector

PERFECT FOR On-the-Go Convenience

"Not just portable. It's the ultimate ultra-portable!"

1 LIGHT Measuring just 1½ inches and weighing only 3.8 pounds, it's as thin as a laptop and as easy to tote around.

2 BRIGHT 3000 lumens color and 3000 lumens white light output for projecting incredible image quality and bright, balanced displays.

3 BEYOND AMAZING Epson's patented 3LCD technology delivers full-time, brilliant color and uses 25% less electricity per lumen when compared to 1-chip DLP projectors.

4 WIRELESS With the wireless LAN module, you can connect to a network or ad hoc to an individual PC via the Quick Connect wireless USB key.

5 PLUG-AND-PLAY Setup is quick, easy and completely compatible with Windows and Mac. Just plug one end of a standard USB cable into the projector, the other into your computer. Nothing to install. Nothing to configure. Or project directly from a USB device—no computer needed.

6 AUTOMATIC Fully automatic vertical/horizontal keystone and Screen Fit function make quick adjustments to align and fit images to any screen.

A

EPSON EXCEED YOUR VISION

A. PowerLite® 1775W Multimedia Projector The ultimate in portable projectors, it's made for radiant widescreen performance and easy wireless connectivity. 1280 × 800 WXGA resolution is perfect for use with the latest generation widescreen computers and great for projecting virtually any content. Native 16:10 aspect ratio lets you take full advantage of your widescreen's capabilities. Virtual remote control via a web browser (when connected to a network) allows basic projector control such as power on/off, source, volume, page up/down and more from your PC or MAC with no special applications or software needed. A/V Mute Slide puts control of your presentation right at your fingertips. 1.2x optical zoom. HDMI connectivity. Built-in closed captioning. Message broadcasting. Sleep mode and Instant Off® features. 1W speaker. Includes UHE lamp that lasts up to 4000 hours, long-lasting, easy-access filter, and carrying case. KNOW The Real World

When good tech goes bad :(*At the 2010 Worldwide Developers Conference, Steve Jobs had to ask attendees to shut down their electronics when he couldn't maintain a solid Wi-Fi connection because of all the individual Wi-Fi and Mi-Fi going on. Awkward and ironic as that was, typically it's human nature that gives tech a bad rap. No matter how discreet you think you are, checking email, tweeting or texting during meetings is distracting, it's rude and it puts pressure on the open network. Most folks I've talked to agree, including a good number of Gen × and Yers. So go ahead, use your tech to take notes. Then, once the meeting's over feel free to tweet, text and blog your brains out.*

HELP Projector Buying Guide

Project Yourself!

Before you dive into the realm of pixels and lumens, answer this: do you want a projector that stays put or one that's great for hitting the road? Now go ahead, read on.

ULTRA-PORTABLE With footprints smaller than a laptop, they weigh next to nothing, something you'll appreciate when lugging gear through an airport. Complete with many of the same features as the bigger guys, there's no sacrificing image quality for convenience. Plus, you get the confidence that comes from knowing your equipment even when presenting in unfamiliar venues.

MULTIPURPOSE A popular choice for conference room, classroom and at-home cinema. These are devices that, at most, go from room to room. Typically they're brighter, more adaptable to big spaces and offer a wider array of input/output terminals.

SMART VALUE If price is an issue, even basic models come with features to deliver impressive image quality and solid projector performance.

Brightness. Resolution. Contrast Ratio. When it comes to the big three features—more is more. The bigger the number, the better the net result. In other words, get it right and what ends up on screen will be just what you pictured.

A PROJECTOR TO "WOW" YOUR AUDIENCE AND YOUR BUDGET.

C. VS200 Multimedia Projector Powered by Epson's advanced 3LCD, 3-chip technology, native SVGA (800 × 600) resolution and 2300 lumens color/white light output, the VS200 delivers vibrant, lifelike images and brilliant color for high-impact presentations in virtually any setting. USB plug-and-play connectivity—one USB cable is all it takes for instant projection from your PC or Mac. Convenient operation comes courtesy of A/V Mute Slide remote control, 1.35x optical zoom, Instant Off/On, Sleep Mode and Direct Power Off/On features. Includes easy-access filter, carrying case and energy-efficient E-TORL lamp that lasts up to 5000 hours. Manufacturer's limited two-year warranty on projector; 90-day on lamp.

Logitech

A

Wireless laser mouse lives on a single set of batteries for up to three years!

A. M705 Marathon Wireless Laser Mouse Big on battery life? Logitech is too. With the M705 you can click, scroll and forget the hassles, expense and waste of frequent battery changes. The Tiny Unifying receiver is small enough to stay in your notebook (no worries about it getting lost or broken)—and it works with up to six wireless devices. Laser precision delivers smoother tracking on just about any surface, even polished or woodgrain tables. Sculpted, right-hand shape with stealth thumb button guides your hand to a naturally poised position and places customizable control within easy reach. Hyper-fast scrolling lets you fly through documents and Web pages with a single spin. Click-to-click scrolling is great for navigating lists, slides and images. USB connectivity. Batteries Required: 2 AA (included). Compatible with Mac® OS × 10.4 and Later; Windows® XP, Vista™, 7. 2¾"w × 4¼"d × 1⅝"h. Manufacturer's limited three-year warranty.

KNOW OEM Consumables

Originality Matters

These days, when talk turns to how to improve productivity and maintain costs, the topic of printing inevitably pops up. Fact is, how high any printing setup scores comes down to the performance of the equipment. Truth? It depends in large part on the type of ink and toner cartridges used. That's where these guys come in.

Brother, Canon, Epson, Lexmark, HP, OKI and Xerox. They're some of the best-selling names in the industry today, and for good reason. These powerhouse brands have blazed the trail for cost-effective, viable print solutions, especially for the SMB.

From their perspective, it comes down to quality. With OEM (original equipment manufacturer) consumables, that's just what you get.

Engineered with the highest level of precision, OEM ink and toner products are produced by the same manufacturer of the correlating printer. The result? Dependable performance, pristine print and more printed pages. Next to nil fail rate. Virtually zero probability of leaks. Pure quality all the way around.

HELP Smart Solutions

Make sure your backup's got your back.

We all know what a handy thing external storage can be. Whether it comes in the form of a desktop device, pocket-size drive or miniature flash, any medium is a friend to your data. Encryption makes it a friend with benefits.

What it is. Encryption is the translation of data into a secret code. Once data is encrypted, you need a key (password) to access it. In other words, no password, no data for you.

Hardware's easy to replace. Data? Not so much. While backing up data is easier than ever, unless you secure the drive, stored data is fair game for anyone who comes in contact with it. And let's face it, with many of us storing more and more sensitive info on the mini drives we carry around, the risk of losing it is fairly large.

Paranoia strikes deep. Encryption provides the peace of mind of knowing that even if your drive falls into the wrong hands, they're not going to be able to do a darn thing with it.

Look for it. Many drives come with encryption already built in. If not, no worries. Free solutions exist. TrueCrypt is a mature open source software system ideal for removable media. Check it out at www.truecrypt.org.

**Spindle product is packaged in a plastic container and does not include jewel cases or inserts.*

Symbol Legend

Indicates a product that offers one or more of the following green options: recycled materials, recyclable, compostable or biodegradable, energy efficient, reusable, or made from materials that produce low chemical or particle emissions.

Made with some recycled material.

Assembly required.

Class 2 Laser Pointers

For use in smaller rooms and restricted use venues. The latest trend in laser pointers—Class 2—increases safety by reducing power, yet still projects a highly visible laser dot up to 150 yards. Class 2 lasers are ideal for use in institutions that regulate laser use, as they are the highest power laser allowed based on most educational and government regulations. It is never acceptable to look directly into any laser pointer beam. This lower powered laser, designed for safe use by responsible adults, allows the body's natural defenses to protect the eyes.

Class 3 Laser Pointers

For use in medium and large rooms. Class 3A laser pointers feature a brighter beam than Class 2. Designed to highlight information up to 500 yards away.

TECH solutions

THE LAST WORD

"The Cure for the Common Meeting."

Most professionals attend more than 61.8 meetings per month and complain that over 50 percent of that time is wasted. Why? Lots of reasons, not the least of which is b-o-r-e-d-o-m. In fact, 39% of professionals surveyed admitted they've actually snoozed during a presentation or two. (Yes, headbobs count). So what's a well-meaning meeting facilitator to do? Well, beyond making sure you've got a real reason to meet and a purposeful agenda, I suggest adding some tech. You don't have to go nuts, but things like webcams for lifelike video conferencing and hi-def projectors for blowout presentations can take any meeting from lame to darn right engaging. Lucky for you, we've got those and plenty of other meeting-enhancing tech right here in our May issue.

Looking for more? There's always more. This time around you'll find a great selection of tech essentials including printers, consumables, storage media and accessories specifically designed to keep your gear safe.

Deals? You bet. Instant savings. Premiums. And more. It wouldn't be Tech Solutions without some seriously sweet deals on tech.

Offers good May 1-31 or while supplies last.
